# WHO WE ARE

## TECHNOLOGY THAT TRANSFORMS. INNOVATION THAT DRIVES.

We are a Brazilian company that goes far beyond the manufacturing of actuators. We deliver innovation with superior quality, developing electronic mechanisms that raise the standard of upholstery and furniture.

With the only control unit on the market compatible with voice commands — via Alexa or Google Assistant — our products represent the most advanced in automation.

For 14 years, Line has been leading a revolution in the furniture sector, creating automated solutions that combine technology, comfort, and smart design.

We evolve with the market, set trends, and develop solutions designed to surprise manufacturers and consumers throughout Brazil.

**BEING A REFERENCE IS WHAT DRIVES US.**

---

EXCLUSIVITY AND TECHNOLOGY

# MORE THAN 20 MODELS IN THE CATALOG

We are pioneers in innovation when it comes to sofa automation. Our portfolio features more than 20 models of electronic upholstery — many of them exclusive.

Over the years, we have been responsible for introducing models to the sector that redefined the experience of comfort and functionality.

More than just keeping up with the market, we set trends.

We create bold and intelligent solutions that elevate the aesthetic and technological standard of furniture — consolidating Line as a reference in automation, innovation, and quality.

LINE

SMART HOME

# TECHNOLOGY THAT CONNECTS. COMFORT THAT OBEYS YOUR VOICE.

**Everything is connected.  
And everything responds to you.**

The experience is smooth, modern, and functional — because the future has already arrived!

In an increasingly connected world, automating furniture transforms practicality into experience. That's why we developed Line Smart Home — an intelligent solution that combines cutting-edge technology with absolute comfort, creating environments ready to keep up with your lifestyle.

Through our exclusive app, you can integrate Line mechanisms with Alexa or Google Assistant and activate every movement by voice command, without leaving your spot.

**EXCLUSIVE  
APP**

Control it with  
your voice.

# OTHER PROPERTIES

# TECHNOLOGY THAT TRANSFORMS REST INTO AN EXPERIENCE

## LINE AUTOMATED BEDS

More than furniture,  
smart solutions.

With functional design and cutting-edge  
technology, automated beds enhance comfort,  
optimize space, and add value to the  
environment with practicality and sophistication.

### BUILT-IN BED WITH SOFA

### BOX BED

# TECHNOLOGY FOR UNIQUE PROJECTS

From the kitchen to the living room, from the bedroom to the most creative spaces — Line actuators easily adapt to different furniture and design concepts.

With smart design, durability, and high performance, our mechanisms raise the standard of any project, whether simple or sophisticated.

Here, technology is shaped to your project.

Line is ready to add value with customized solutions that combine innovation, functionality, and exclusivity.

## BUILT-IN SPICE HOLDER

## MIRROR WITH SAFE

## LIFT TV

## FLAP TV

# ACCESSORIES

## LIFT TABLE

Functional design and cutting-edge technology. The Lift Table is an automated retractable table that discreetly appears and transforms the furniture into an even more practical and modern space. Activated by any of our systems, it combines convenience and sophistication in an exclusive design — ideal for those who value comfort without compromising aesthetics.

## MUSIC PLAYER

With the Music Player, the upholstery comes to life with a built-in high-quality sound system. A complete kit, installed directly into the furniture, that provides an immersive experience for moments of relaxation and leisure. It is innovation that unites comfort, functionality, and style in a single product.

### USB + TYPE C CHARGER

Technology within your reach. With USB and Type-C ports, the attachable charger ensures convenience for powering devices without losing comfort in the moment.

### INDUCTION CHARGER + USB + TYPE C

Smart and versatile charging. Modernity and efficiency in a single accessory: wireless charging or cable connection, with options for USB and Type-C. More freedom and connectivity built into the furniture.

### CUP HOLDER WITH HEIGHT ADJUSTMENT

More comfort, more practicality. The height-adjustable cup holder adapts to everyday use, offering a personalized and elegant furniture experience.

FRONT VIEW

TOP VIEW

LEFT FRONT VIEW

Perfect for upholstery, furniture, and beds, Line's linear actuator has unique features that make it easy to apply in different models and structures.

With a compact, resistant, and functional design, it ensures wide opening with smooth and precise movements — all through an exclusive electronic mechanism developed by Line Actuators.

## VERSATILITY THAT ADAPTS TO YOUR PROJECT

### CONTROL UNIT

The Electronic Control Unit is an exclusive feature from Line Actuators. Designed to provide greater safety, convenience, and efficiency, it includes automatic shutoff by force, intensity adjustment, and both manual and automatic activation options — all designed to adapt the mechanism to your project with maximum performance.

### BIVOLT POWER SUPPLY

The Power Supply is another unique feature offered only by Line Actuators. In addition to being bivolt, for sofas with one or more seats, only a single power supply is needed for perfect operation.

# TYPES OF ACTIVATION

## SOFT TOUCH

For upholstery. Internal sensors are activated with a gentle touch on the fabric itself.

## WIRELESS REMOTE CONTROL

For upholstery, furniture, and beds. Easy activation.

## TOUCH BUTTON

For upholstery and furniture. Just a light touch is enough to activate the mechanism.

## BUTTON

For beds. The button is integrated into the furniture, giving it an elegant and technological touch.

## VOICE COMMAND

Comfort within your reach. Voice command activation is the future brought into your projects today. A solution that combines convenience, accessibility, and innovation, enhancing the user experience with more freedom and modernity in every project.

# QUALITY AND WARRANTY

Warranty of 2 years  
for Manufacturers

In-house production, made with the  
most modern and advanced  
technology on the market.

National product.

All products are developed with a focus on efficiency, safety, and high performance. Before reaching the market, they undergo rigorous testing to evaluate their application and ensure the best user experience for the final consumer.
