ATUADORES

15
YEARS of
INNOVATION

A modern white sofa is positioned in a bright room with large windows in the background. The sofa is the central focus of the image, and the text is overlaid on it.

Line

We didn't just transform sofas.
We helped transform the industry.

15
YEARS of
INNOVATION

For 15 years, Line Actuators has been driving innovation in motion technology while evolving alongside Brazil's furniture industry. As a pioneer in motion solutions for upholstered furniture in the country, we continue to develop technologies that combine engineering excellence, comfort, sophistication, and innovation to enhance the end-user experience.

Throughout this journey, we have helped shape the industry's evolution by creating increasingly intelligent, versatile mechanisms that meet the changing needs of furniture manufacturers. More than producing actuators, we engineer solutions that add value to products, support innovation, and help manufacturers deliver outstanding furniture to the market.

For 15 years, Line has proudly represented Brazilian engineering, continuously developing technologies that meet today's demands while helping shape the future of the furniture industry.

15 years moving the furniture industry forward through
engineering, innovation, and motion.

ABOUT US

BRAZILIAN ENGINEERING WITH PURPOSE, INNOVATION, AND A VISION FOR THE FUTURE.

Line Actuators is a Brazilian manufacturer specializing in the development of electronic motion solutions for the furniture industry. We drive the evolution of automation for upholstered furniture, furniture applications, and a wide range of industrial sectors by engineering mechanisms that combine performance, sophistication, comfort, and intelligent functionality.

Our journey has been defined by pioneering innovation, continuous technological advancement, and the development of solutions that have transformed the consumer experience in the Brazilian furniture market. Backed by in-house engineering and proprietary technologies, we design systems that meet the demands of an ever-evolving industry, including a smart control unit compatible with voice commands through Amazon Alexa and Google Assistant.

Our mission is to develop solutions that expand possibilities, add value to furniture designs, and empower manufacturers seeking differentiation, advanced technology, and premium quality.

**DRIVING THE INDUSTRY FORWARD HAS
ALWAYS BEEN PART OF OUR HISTORY.**

EXCLUSIVE TECHNOLOGY

SOLUTIONS THAT HAVE TRANSFORMED
AUTOMATION IN THE FURNITURE INDUSTRY

OVER 25 MODELS IN OUR PORTFOLIO

Line Actuators has built its reputation by developing solutions that have shaped the evolution of automation for upholstered furniture and the broader furniture industry in Brazil. Our portfolio includes more than 25 electronic motion mechanisms, featuring proprietary designs created to enhance comfort, functionality, and sophistication, as well as custom-engineered solutions developed in partnership with leading furniture manufacturers.

Over the years, we have introduced technologies that have redefined technical standards and expanded the possibilities for furniture design and motion. Every solution is driven by the combination of engineering expertise, advanced technology, and market insight, resulting in products designed to help manufacturers achieve greater differentiation, innovation, and performance.

Rather than simply following industry trends, we develop technologies that help drive the future of the furniture industry.

UNLIMITED COMFORT

INTELLIGENCE THAT
SPEAKS YOUR LANGUAGE.

**Everything works seamlessly together.
Every command is executed with precision.**

The experience is intuitive, effortless, and designed for a connected world because smart automation knows no boundaries.

**EXCLU-
SIVE
APP**

**Control it
with your
voice.**

Line Actuators developed Line SmartHome to seamlessly connect automation, comfort, and technology in one smart, modern experience. Through integration with Amazon Alexa and Google Assistant, Line motion systems can be controlled by voice commands or through the dedicated mobile app, delivering greater convenience, accessibility, and ease of use.

Today, the Line SmartHome Skill is available in multiple countries across the Americas and supports Portuguese, English, and Spanish, expanding the reach of Brazilian engineering in connected furniture solutions worldwide.

Connectivity, intelligence, and automation are no longer emerging trends—they have become the new standard for the furniture industry.

LINE SMART HOME

LAUNCHES 2026

Engineering Evolution. Solutions That ANTICIPATE THE MARKET.

Line Actuators' 2026 product launches represent a new stage in automation, with solutions developed to expand possibilities, optimize processes, and elevate the experience delivered to the end user.

Each new product reinforces Line's commitment to developing solutions that anticipate market evolution and expand possibilities.

FLATLIVING

Flatliving

The definition of versatility for manufacturers: one mechanism, three possibilities, combining intelligent design with ease of assembly.

The mechanism delivers a sophisticated, discreet appearance without looking like a traditional retractable sofa, while providing comfort and functionality.

SIDESLIP MAX

Sideslip Max

The new name for Line's family of retractable mechanisms, offering excellent space optimization in both the closed and open positions.

2026

MARKS A NEW CHAPTER IN THE
BRAZILIAN AUTOMATION

LINE STORAGE BED

LINE STORAGE BED

Featuring a hybrid operating system that allows the mechanism to function even during power outages, providing greater safety, convenience, and reliability for the user.

QUALITY AND GUARANTEE

5-year warranty
for manufacturers.

Manufactured in-house using
the most advanced technologies
available.

Made in Brazil.

Line Actuators' mechanisms are engineered to deliver performance, durability, and reliability for applications that demand the highest standards of operation. Before reaching the market, every product undergoes rigorous testing and validation processes to ensure operational efficiency, safety, and maximum performance under a wide range of operating conditions.

Each solution is designed to provide stability, durability, and a superior end-user experience, reflecting Line's commitment to engineering excellence, superior manufacturing quality, and continuous innovation.

POWERED BY LINE

THE NEW SYMBOL OF LEADERSHIP IN THE INDUSTRY.

The **POWERED BY LINE** seal was created to identify manufacturers that choose to evolve alongside the technology transforming Brazil's upholstered furniture industry. More than a label applied to the product, the seal represents Brazilian engineering, continuous innovation, operational reliability, and solutions developed by a brand that helped redefine automation standards in the furniture industry.

Over the past 15 years, Line Actuators has driven a new generation of automated furniture, bringing together comfort, intelligence, and functionality in increasingly sophisticated designs. **POWERED BY LINE** communicates to the market that advanced technology is behind every movement, backed by dedicated support, proven quality, and engineering developed to keep pace with the evolution of both the industry and today's consumers.

For manufacturers, the seal strengthens brand positioning, adds value to the final product, and reflects a choice based on trust, performance, and differentiation.

OTHER FURNITURE APPLICATIONS

TECHNOLOGY THAT TRANSFORMS REST INTO AN EXPERIENCE

Line solutions expand the possibilities of automation across a wide range of applications.

Among the highlights, the new Line Storage Bed features an exclusive hybrid operating system, allowing access to the storage compartment even during power outages. A unique feature that provides greater safety and convenience for the user while adding even more value and exclusivity to manufacturers' designs.

WALL BED

STORAGE BED

NEW
SYSTEM

AUTOMATION THAT ADAPTS TO THE CREATIVITY OF YOUR DESIGN

Line Actuators expand the possibilities of automation beyond upholstered furniture, bringing intelligence, functionality, and sophistication to a wide range of furniture applications.

Used in residential, commercial, and custom furniture projects, our mechanisms adapt precisely to designs that demand performance, efficient use of space, and seamless integration of technology and design.

BUILT-IN SPICE RACK

MIRROR WITH HIDDEN SAFE

LIFT TV

FLAP TV

ACCESSORIES

LIFT TABLE

Functional design meets advanced technology. The Lift Table is an automated retractable table that rises discreetly, transforming the furniture into an even more practical and modern living space. Compatible with any of our control systems, it combines convenience and sophistication in an exclusive design, ideal for those who value comfort without compromising aesthetics.

SWIVEL SIDE TABLE WITH CUP HOLDER

The manual swivel side table is designed to add even more functionality to a recliner or upholstered furniture. Its swivel motion and integrated cup holder enhance the furniture's functionality, providing added convenience and comfort.

USB + USB-C CHARGER

Technology within reach. Featuring USB and USB-C ports, this built-in charger provides a convenient way to charge your devices without compromising your comfort.

WIRELESS CHARGER + USB + USB-C

Smart and versatile charging. Modern design and efficiency in one accessory: charge wirelessly or via cable, with USB and USB-C connectivity. Greater freedom and connectivity built into your furniture.

HEIGHT-ADJUSTABLE CUP HOLDER

More comfort, more convenience. The height-adjustable cup holder adapts to everyday use, providing a personalized and elegant furniture experience.

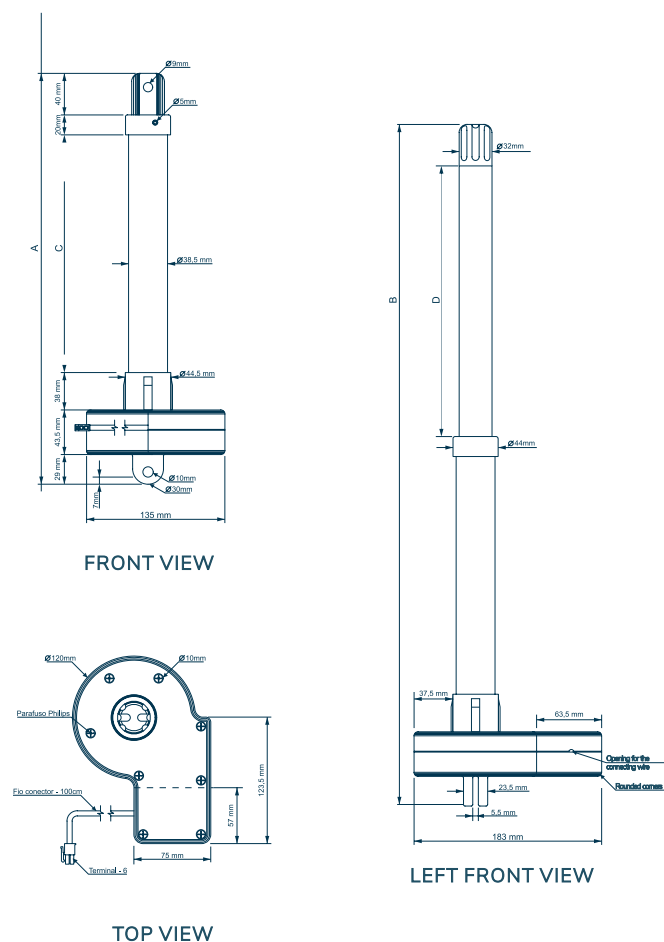

LINE ACTUATOR

BRAZILIAN ENGINEERING
DESIGNED FOR
HIGH PERFORMANCE

Developed to meet a wide range of applications with efficiency, durability, and precision in every movement. Used in upholstered furniture, automated beds, and many other furniture applications, Line mechanisms stand out for their durability, functionality, and outstanding operational performance.

All engineering is developed in Brazil, enabling agile manufacturing, responsive technical support, and the continuous evolution of our solutions to meet the real needs of furniture manufacturers and the industry.

ELECTRONIC CONTROL UNIT

The Electronic Control Unit is an exclusive Line Actuators solution. Developed to provide greater safety, convenience, and efficiency, it features automatic overload shutoff, adjustable force settings, and both manual and automatic control options—all designed to adapt the mechanism to your project with maximum performance.

BIVOLT POWER SUPPLY

The Power Supply is another exclusive feature offered by Line Actuators. In addition to supporting 100–240V power input, only one power supply is required to ensure proper operation, even for upholstered furniture with one or more seats.

OPTIONS CONTROL

SOFT TOUCH

For upholstered furniture. Built-in sensors are activated with a gentle touch directly on the fabric.

TOUCH BUTTON

For upholstered furniture and furniture applications. A simple touch is all it takes to activate the mechanism.

BUTTON

For beds. Integrated into the furniture, the button adds a refined and modern touch to the design.

WIRELESS REMOTE CONTROL

For upholstered furniture, furniture applications, and beds. Easy and convenient operation.

VOICE CONTROL

Comfort at your command. Voice control brings the future into your projects today. A solution that combines convenience, accessibility, and innovation, enhancing the user experience with greater freedom and modern functionality.

**EXCLUSIVE
EXPERIENCE
